

AI + Cybersecurity Summit

Sponsor Prospectus

February 24-26, 2027

Park City, Utah

Why Après Exists

The Future of Cybersecurity Will Be Shaped by AI

Artificial intelligence is rapidly transforming how organizations defend, detect, investigate, and respond to cyber threats. At the same time, AI introduces entirely new risks, attack paths, governance challenges, and operational realities.

Security leaders are navigating one of the most significant technology shifts in decades.

Après-Cyber Slopes Summit was created to bring together the leaders shaping that future.

A Different Kind of Security Conference

Après-Cyber is intentionally designed as a focused, high-trust gathering where cybersecurity executives, AI innovators, researchers, founders, and practitioners can exchange ideas, share lessons learned, and build meaningful relationships.

Rather than prioritizing scale, we prioritize connection.

Rather than marketing presentations, we prioritize practical insight.

Rather than crowded expo halls, we create opportunities for genuine conversations.

Where AI and Cybersecurity Leaders Connect

Set against the backdrop of Park City, Utah, Après-Cyber combines executive-level networking, technical innovation, and strategic discussion in an environment designed to encourage collaboration.

Attendees leave with:

- Actionable insights they can apply immediately
- New perspectives on AI and cybersecurity
- Meaningful relationships with peers and industry leaders
- A deeper understanding of emerging risks and opportunities

Building the Future Together

The most important conversations in cybersecurity are no longer happening within a single organization.

They happen when leaders, researchers, innovators, and practitioners come together to share ideas, challenge assumptions, and collaborate on the future.

That is why Après-Cyber exists.

Who You'll Meet

**Meaningful conversations. Practical insights.
Lasting Connections.**

Après-Cyber Slopes Summit brings together a curated community of cybersecurity leaders, AI innovators, technology executives, founders, researchers, and practitioners who are actively shaping the future of AI and security.

Because the summit is intentionally limited in size, attendees have greater access to speakers, sponsors, and industry peers than at traditional large-scale conferences.

Security Leadership

- CISOs
- Security Directors
- Security Architects
- Incident Response Leaders

AI & Technology Leaders

- AI Researchers
- AI Security Specialists
- Technology Executives
- Product Leaders

Builders & Innovators

- Founders
- Security Engineers
- Startup Leaders
- Investors

Public Sector & Academia

- Government Security Leaders
- University Researchers
- Students & Emerging Talent

Expected 2027 Audience

200+ Cybersecurity & AI Leaders

20+ Industry Speakers

3 Days Workshop, Briefings & Networking

Unlimited Relationship building opportunities

Organizations Represented

A curated community of cybersecurity leaders, AI innovators, researchers, founders, and executives from organizations such as:

Public Sector, Defense & Research Participation

Department of Defense • United States Air Force • Idaho National Laboratory • NASA •
National Credit Union Administration

What Makes Après Different?

A focused environment designed for meaningful conversations, practical insights, and lasting relationships.

Curated, Not Crowded

Unlike large industry events with thousands of attendees, Après-Cyber intentionally limits attendance to create greater access between speakers, sponsors, executives, and practitioners.

Result: More meaningful conversations and higher-quality interactions.

AI + Cybersecurity Focused

Every aspect of the summit—from workshops and briefings to networking and the CTF—is designed around the rapidly evolving intersection of artificial intelligence and cybersecurity.

Result: Highly relevant discussions for today's security leaders.

Executive & Technical Communities Together

Après brings together CISOs, security leaders, researchers, founders, engineers, and innovators in the same environment.

Result: Sponsors engage with both decision makers and practitioners.

Built for Relationships

Park City provides a unique setting that encourages conversations beyond the conference room through meals, networking events, and informal discussions.

Result: Stronger connections and greater long-term value.

The Après Experience

- ✓ Hands-On Workshops
- ✓ Expert Briefings
- ✓ AI-Focused CTF
- ✓ Executive Networking
- ✓ Sponsor Engagement
- ✓ Mountain Venue Experience

Sponsorship Packages

Flexible opportunities are designed to help sponsors build relationships, showcase innovation and engage with cybersecurity and AI leaders.

Benefits	Summit Partner	Alpine Partner ★	Trail Partner	Basecamp Partner
Investment	\$25,000	\$15,000	\$10,000	\$5,000
Available	1	2	4	6
Conference Passes	10	8	6	4

Program Recognition	☒	☒	☒	☒
Verbal Recognition	☒	☒	☒	☒

Which Package Is Right For You?

Summit Partner: Maximum visibility and thought leadership opportunities for organizations seeking premier presence.

★ Alpine Partner: Strong brand exposure and meaningful engagement with attendees throughout the summit.

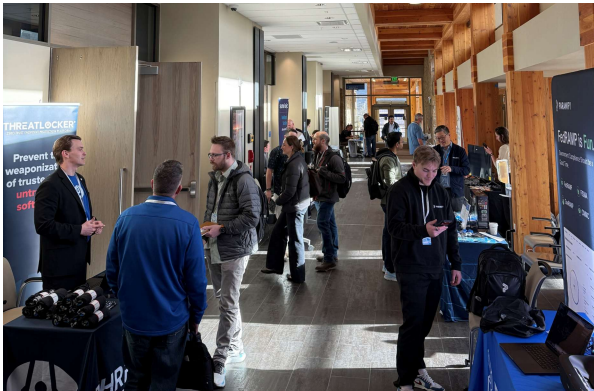

Trail Partner: Balanced visibility and networking opportunities for growing organizations.

Basecamp Partner: An accessible way to connect with the AI and Cybersecurity community.

★ Our Alpine package provides the strongest balance of visibility, attendee engagement, and networking opportunities.

Featured Sponsor Opportunities

Create memorable experiences and meaningful connections throughout the summit.

Apres-Ski Happy Hour

Associate your brand with a relaxed environment where conversations continue beyond the conference sessions.

Ideal For:

High-touch networking and brand awareness.

1 Available

\$5,000

AI CTF Sponsor

Support the hands-on AI security competition and engage directly with technical practitioners.

Ideal For:

Developer and security engineering audiences.

1 Available

\$5,000

Breakfast Sponsor

Welcome attendees and start every conversation with your brand.

Ideal For:

High visibility throughout the morning

2 Available

\$3,000

Lunch Sponsor

Prominent branding during one of the summit's busiest networking periods.

Ideal For:

Broad attendee exposure.

2 Available

\$4,000

Lanyard Sponsor

Visible branding worn by attendees throughout the entire event.

Ideal For:

Maximum brand recognition.

1 Available

\$5,000

Looking for something unique?

We work closely with sponsors to create custom experiences aligned with your goals. Let's build something together.

Let's Build the Future of AI Security Together

Après-Cyber Slopes Summit brings together cybersecurity leaders, AI innovators, researchers, founders, and decision-makers for meaningful conversations, practical insights, and lasting relationships.

We would welcome the opportunity to discuss how your organization can participate in the 2027 summit.

Sponsorship Opportunities Are Limited

To preserve the quality of the attendee experience, sponsorship opportunities are intentionally limited.

Reserve your sponsorship early to secure preferred placement and engagement opportunities.
